about the jerome bettis bus stops here foundation

“So many youths have little support and direction to foster self-esteem and self-worth. By not providing those with the recreational and educational support and outlets that they need to become productive, successful, and honorable members in society, we are all at a loss.” – Jerome Bettis

“The Jerome Bettis Bus Stops Here Foundation” seeks to improve the overall quality of life for troubled and underprivileged children by offering opportunities to help them succeed. One of the Foundation’s most exciting initiatives is the “Cyber Bus” Computer Engineering Program which seeks to bridge the “digital divide” that separates middle and high school youth with limited access to technology from this vital, potentially life-changing resource.

But that’s only one stop for “The Bus Stops Here.” We believe the first step towards self-sufficiency consists of a strong moral foundation, incorporating the development of strong self-esteem, responsibility and educational success. Join us, as we strive through scholarships, football camps and neighborhood programs to bring about changes in young peoples’ lives – “right here, right now”.

the inaugural jerome bettis caring for kids all-star event

september 8, 2006

coca-cola great hall, heinz field

6:30 p.m. reception and auction preview
